

|Fling Fulfillment App Design

(Demo APP)

Fling | Splash Screen

Dark background

To enhance the glow effect and make data seen clearly

New Logo (just placeholder)

We need a new logo designed as current one does not suit flat UI

App Name along with tagline

This allows for curious users to immediately know what the app does

Button to begin using the app

This forwards user to appropriate page depending on user registration status

Fling | Registration

Checkbox confirming location

This field shall be used to collect the users current location for future reference

QR code through camera

The user shall register with QR code found on the landing pad, this allows registration of landing pad

Register to Begin

Ensure all fields are filled

Full Name

Email

Phone number

☐ Share location

Scan landing pad QR

Register

Screen Name and Instructions

This is to remind the user which page they are on

Various Input fields

These shall be used to collect users information, all fields need to be filled with correct validation

Fling | Shop Page

Nav Toggle button

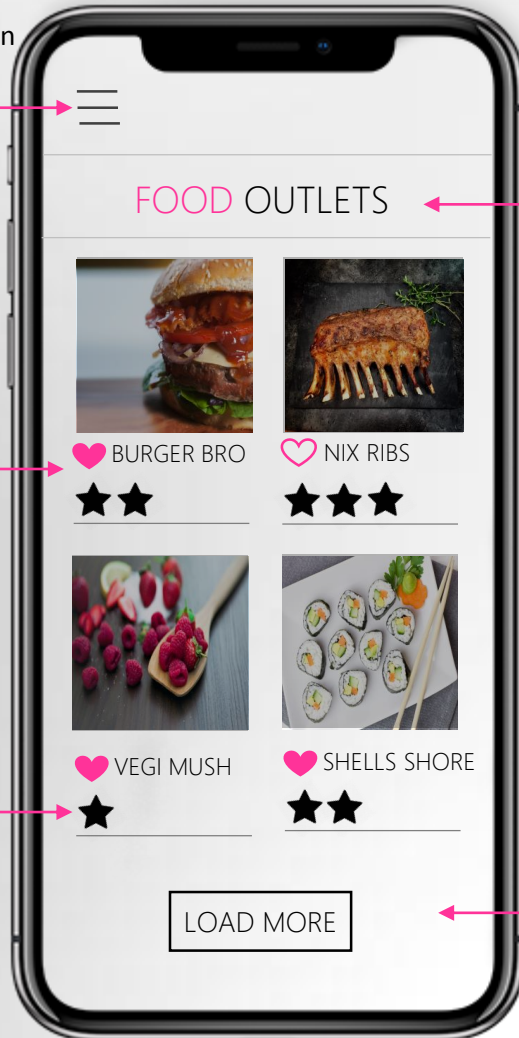

This button can be used to open the navigation bar at any time and close it too

Heart Wishlist

A solid heart represents a product located in the Wishlist

Ratings

The stars represent the restaurant ratings based on confirmed user reviews

Screen Name

To help users know where they are in the app

Map with Marker

Used to display the restaurant location

Button to show Menu

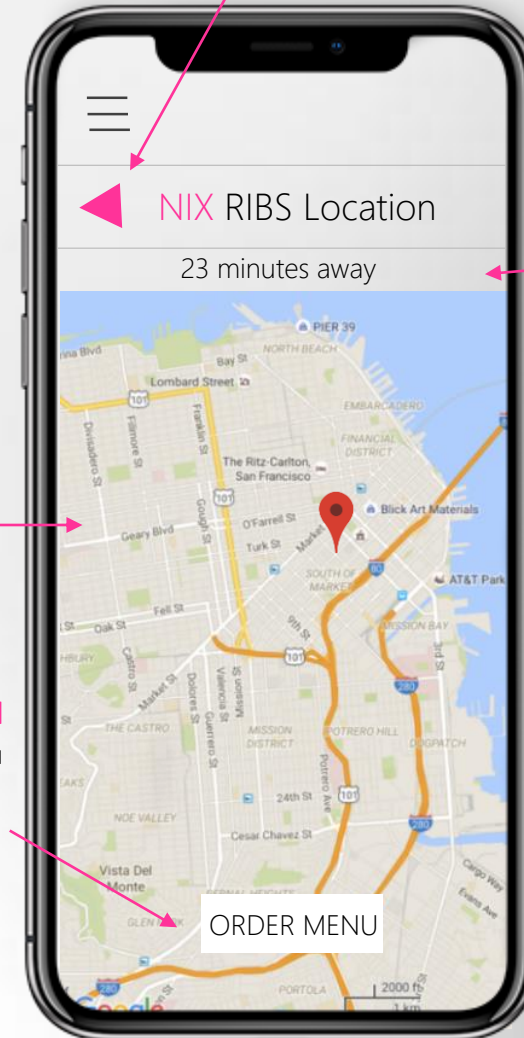

User will be presented with a menu from that restaurant

Load button

To load more food outlets stored in the database

Back Arrow

This can be used to navigate back to previous screen

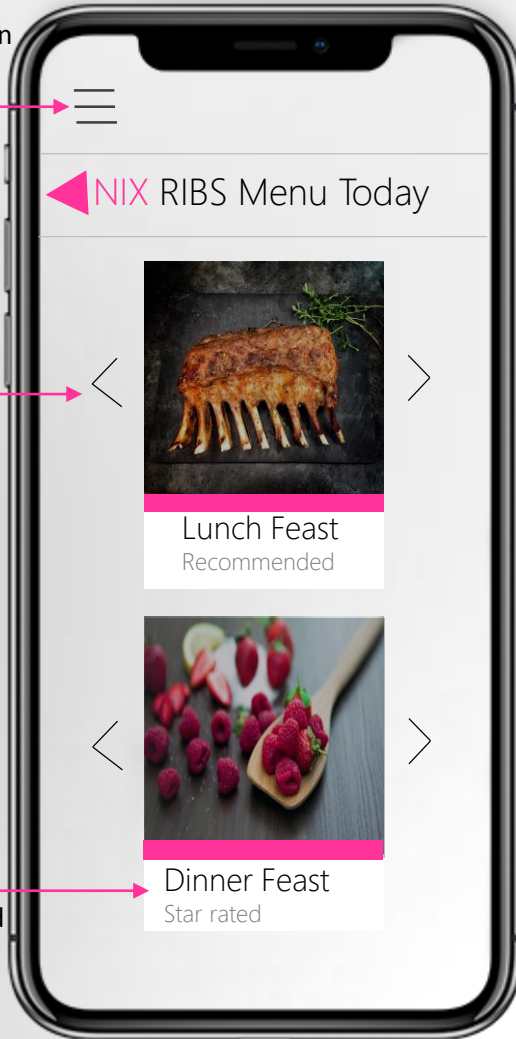

Distance Away

Time based on distance from home

Fling | Menu Page

Nav Toggle button

This button can be used to open the navigation bar at any time and close it too

Arrow buttons

These can be used to browse through food images to find the right food for you

Food Category

A food category can be assigned so the system knows what kind of meal your looking for as well as the restaurants rating

Back button

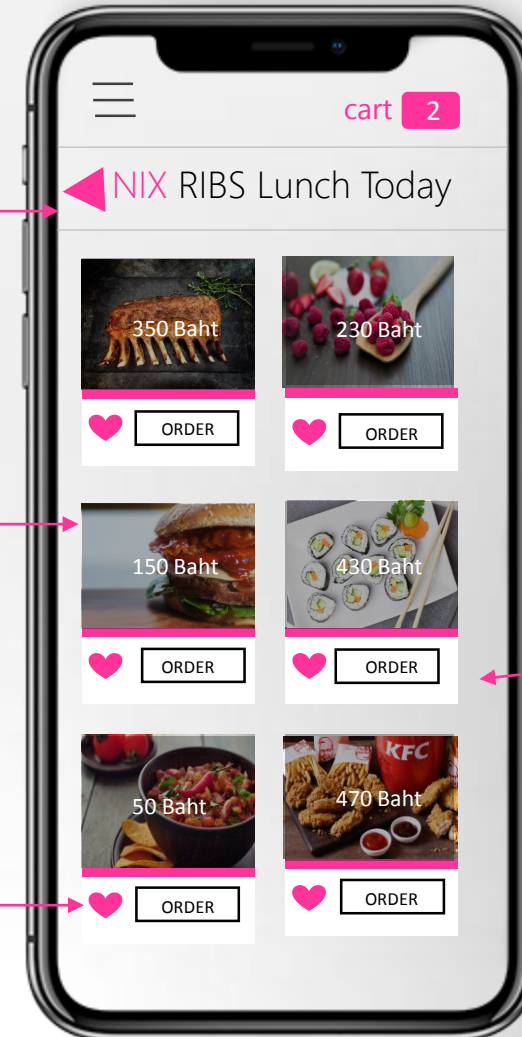

This button can be used to navigate to the previous screen if need be

Food Options

Food options should be displayed as scrollable with images

Heart Button

This can be used to add to Wishlist to make suggestions more meaningful in future

Order Button

This can be used to add a product to cart and process it for checkout

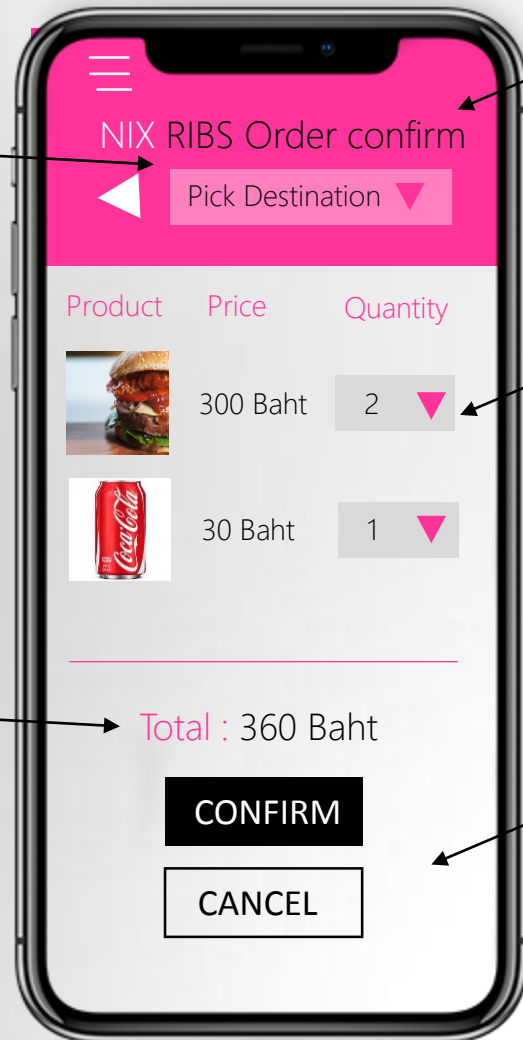

Fling | Order Page

Icon meanings

- In delivery
- Delivered
- Needs Attention

Destination input

A dropdown box can be used to enter a final destination input for the product to be delivered too

Screen Title

Just to let users know that they are on orders screen and cart screen respectively

Order Information

We can list most vital order information which is product, price and quantity. Users should be able to pick a quantity from a **drop down box**

Confirm Buttons

We can have two buttons a confirm and a cancel button, the confirm button confirms the order and sends a notification for a delivery to take place and cancel order deletes all cart information

Orders Listed

We want to list order names and statuses for users to track their orders

Prompt label

A label to prompt the user to ensure that the landing pad is ready for a delivery to take place

Total Cost

We will have a total cost label which sums all expenses for the user to see total cost

Fling | Delivery Info Page

Current Delivery

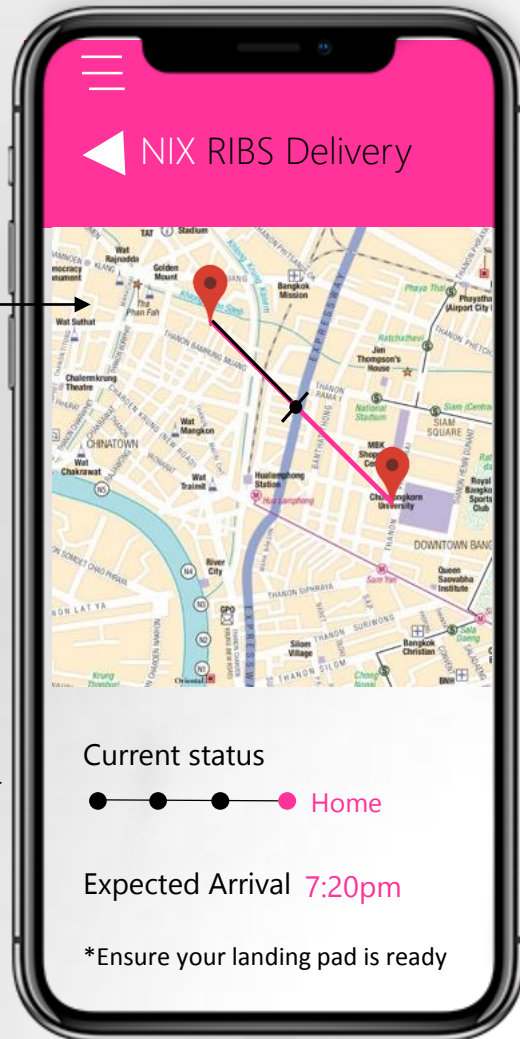

This page displays a current delivery status in real time

Map

Displaying delivery progress, the black represents travelled distance

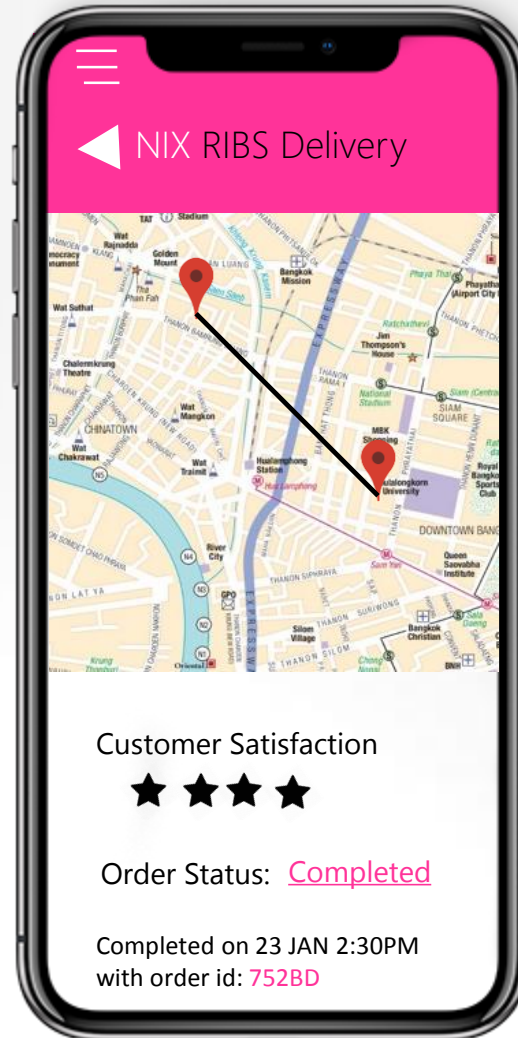

Status Updates

This displays updates about your delivery along a line black represents past

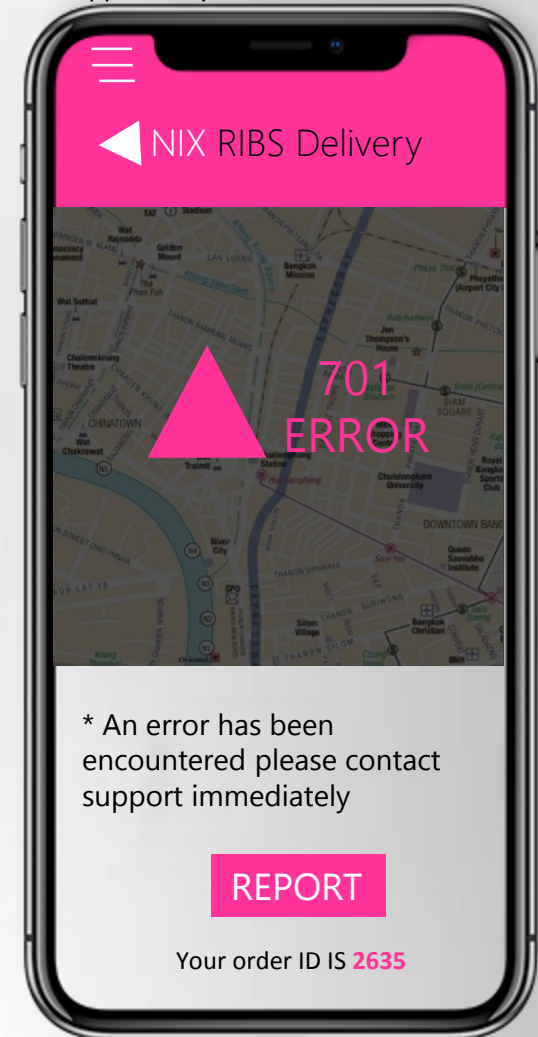

Past Delivery

This page displays a past delivery along with order details

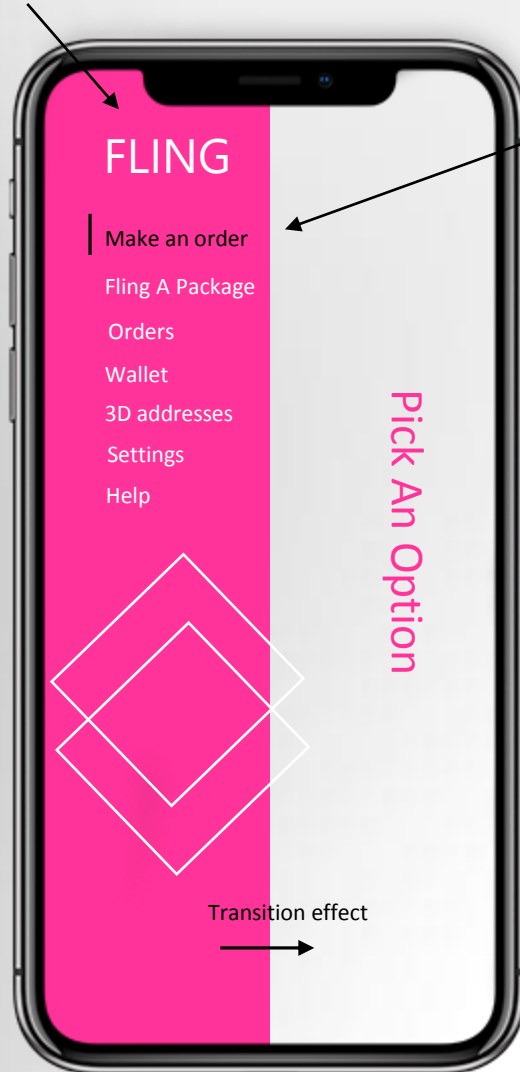

ERROR

For error handling purposes we have a separate page with information customer support may want to know

Smooth Slide Transition

Upon clicking the toggle button there should be a smooth slide transition of the navigation bar coming out from the left hand side

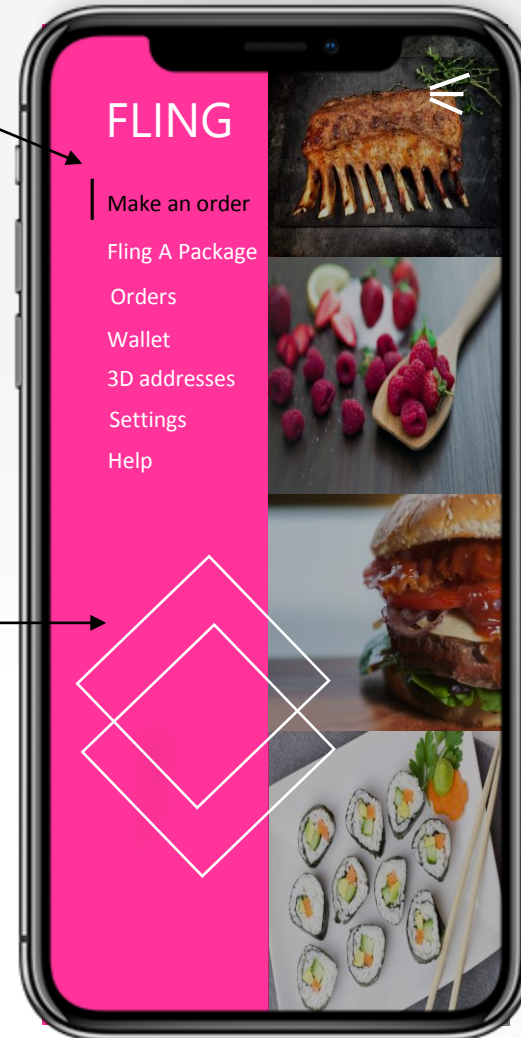

Fling | Nav Bar Toggled

Highlighted Orders

Orders are highlighted in black for easy navigation and understanding on which page they are on

Logo

This is just an example logo however we will create a logo somewhat like this to make a fancy flat UI

Toggle Button

The toggle button should change form upon clicking it. If user clicks it again the side bar will go back in

Fancy Images

In an attempt to tempt users to ordering more food we have used a strategy of adding mouth watering images along side the nave bar

Fling

Get it where you need it most, both
affordably and on
